FIT3179 Data Visualisation 2

Smoking in Australia

Exploring smoking behaviour, demographic differences and changing patterns over time.

(Australia) (1991-2025) (11 visualisations)

Smoking Trends	Age & Sex	Geography	E-cigarette use

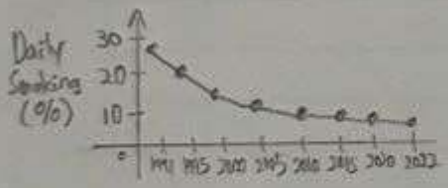

Smoking is declining — but the pattern is not the same for everyone.

This visualisation explores how smoking behaviour in Australia has changed over time, and how patterns differ by age, sex, geography and generation. It highlights key trends and disparities using data from 1991 to 2025.

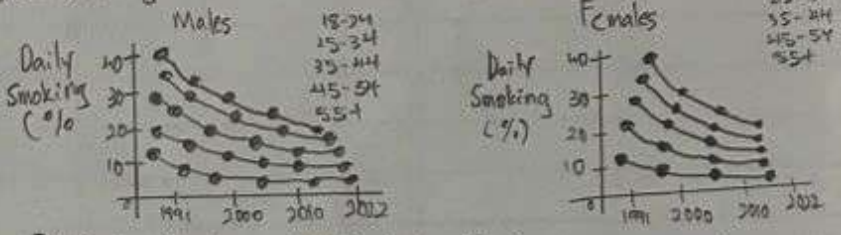

24.3% → 5.6%

Daily smoking prevalence, 1991 to 2025

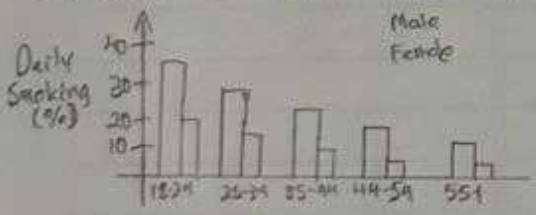

01 National Smoking Trend

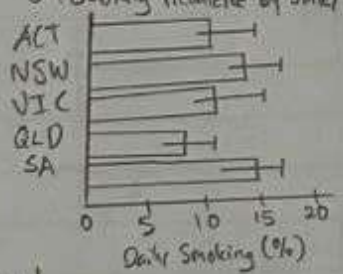

02 Smoking trends by age and sex

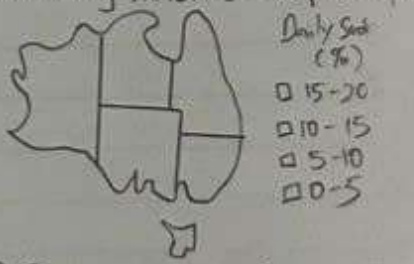

03 Current Smoking across age groups

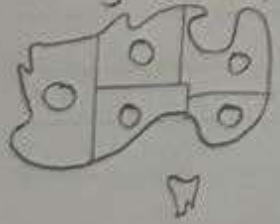

04 Smoking Prevalence by State/Territory

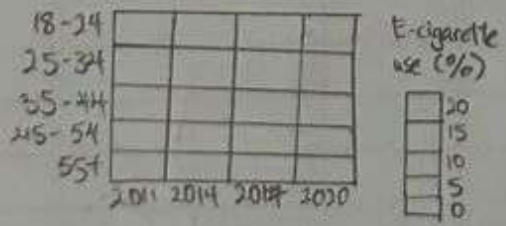

05 Smoking Prevalence (Choropleth Map)

06 Smoking Prevalence (Spatial Map)

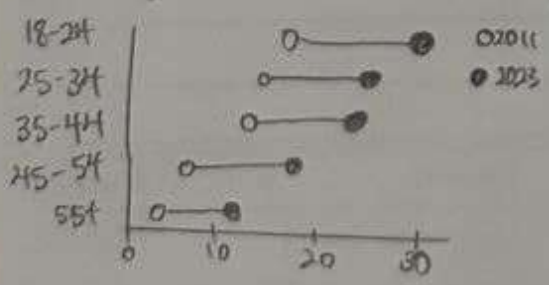

07 Vaping across age groups
